

TRANSFORMING THE PATIENT EXPERIENCE™

The eVideon™ Interactive Patient Television System

Patients are expecting more and more from healthcare facilities. Ever more discriminating, they now assume the modern conveniences they are accustomed to should be the norm when they stay away from home. As the standard of comfort rises, healthcare facilities are facing increasing pressure to keep up with consumer expectations and enhance the patient experience.

eVideon™, the premier Interactive Patient Television System from Optimal Solutions Inc., can increase your healthcare facility's ability to compete in today's healthcare marketplace by helping make your facility the clear choice for patients in your community.

Patient Control At The Touch Of A Button

The eVideon Interactive Patient Television System increases patient comfort and control at the touch of a button. It links patients to the world at a time when they need to feel more comfortable. Using the healthcare facility television as the portal, eVideon connects your patients to high speed Internet as well as to a wide range of high definition entertainment and educational choices.

eVideon enhances the reputation of your healthcare facility as well as your facility's patient satisfaction scores by transforming the patient experience. From high definition digital TV to DVD-quality new release movies, video games and music, eVideon welcomes patients with a wealth of personalized entertainment and educational choices on demand, as well as a means to access meal selection and hospitality services. It helps facilities cost-effectively create a patient experience that adapts to a patient's individuality and caters to the patient's needs. Patients can also gain understanding of their own health issues using state-of-the-art on demand health education programming. And, the system can provide your healthcare facility with automatic assessments of patient progress for JCAHO reporting.

eVideon's personalization doesn't stop with the patient. Just as no patient is the same, eVideon realizes that each facility has different requirements as well. The eVideon system and Optimal Solutions adapt to your healthcare facility's specific needs and increase patients' ability to interact within your facility.

In addition to patient benefits, eVideon's educational capabilities extend beyond patients' needs, and beyond the television. Healthcare facility staff and caregivers can use the system to fulfill professional education requirements and receive training on demand right from their computer.

Expect More With Optimal Solutions

Optimal Solutions goes beyond the cookie-cutter approach with their advanced technology. Optimal Solutions provides real, facility-specific solutions that keep your facility's challenges and patients' needs and preferences in mind. eVideon is a strong tool specifically engineered to evoke the feeling of comfort and control necessary to put your patients at ease.

At Optimal Solutions, we believe in personalized service and solutions tailored to your facility's needs. With eVideon your facility receives a best-of-breed solution to increase your patients' satisfaction with complete system control by your facility. Continuing updates are always available by download and our dedicated experts offer support when you need it. Your healthcare facility's success is our number one goal. When you call Optimal Solutions, you will find a team of dedicated experts who truly care about your patients and your facility's success.
